Self-taught developer building management systems, applications and websites across frontend, backend and data. Adaptable to unfamiliar technologies through AI-assisted learning and implementation, paired with technical judgment, documentation, tests and validation. Collaborative, disciplined and focused on clear, maintainable solutions.

Selected projects

Huracorp | Waste-management software

- Laravel 12 / MySQL operational software linking services, sites, personnel and waste weight records with heuristic route planning.
- Geographic k-means grouping with Haversine distance; time-aware nearest-neighbor stop ordering considers customer time windows, waiting and service periods. Driver and vehicle checks, depot return and duration warnings support planning.

CRM Maia Consultores

- Laravel / Livewire / MySQL customer and quote records, role-based access and event-driven automation. Per-user Gmail OAuth, queued PDF attachments and idempotency controls; one-way CRM activity delivery to Google Calendar with linked-event reconciliation.

Maia Plagas | Pest-control operations

- Laravel 12 application for costed quotes, multi-date services, staff assignments and inventory. GPS and photo field evidence, treatment records and operational PDF/Excel reports.

Maia License Server

- HTTP licensing service with domain binding, lifecycle records, signed response payloads, grace-period fields, operational logs and request throttling.

Achievements

Startup Perú 2025

- Won Startup Perú 2025 with Maia Plagas.

Meta Tech Provider

- Transformed Maia Consultores into a Meta Tech Provider.

Jean Pierre André Ayala Viera

Software Developer

Freelance experience

Portal Esaalud Neuro | Freelance Developer

June–August 2023

- PHP MVC / MySQL system with frontend interfaces for users, staff and administrators; RENIEC API integration for user registration. JavaScript, SQL, CSS and Git.

Bodega Don Pedro | Freelance Developer

February–April 2023

- Commerce storefront and administration panel with Next.js, React, Tailwind, NextAuth and MongoDB; frontend and backend implementation.

Pizzería Elena | Freelance Developer

August–October 2022

- Pizza-commerce storefront and administration interfaces using MongoDB, React, Next.js and Tailwind.

Personal project

School communication system

December 2023–February 2024

- Laravel MVC / PHP / MySQL system for communication and document handling among guardians, students, teachers and directors.

Technical skills

Web & application development

- JavaScript, TypeScript, PHP, React, Next.js, Astro, Laravel, Node.js, Express, HTML, CSS and Tailwind.

Data & tooling

- MySQL, PostgreSQL, MongoDB, SQL, data modeling, Git, GitHub, Docker and n8n. Communication, problem solving, teamwork and adaptability.

Training

Google & Udemy

- Google: Web Development. Udemy: React, PHP and Laravel.

Languages

Spanish (native) · English (intermediate)
