AI ENGINEERING

Generative AI · RAG · Vector databases · LLM apps · Python · n8n automation · AI agents (multi-agent)

BACKEND

PHP · Laravel 12/13 · Livewire 4 · Node.js · Express · REST / OAuth

FRONTEND

JavaScript · TypeScript · React · Next.js · Astro · Tailwind · HTML / CSS

DATA & DEVOPS

MySQL · PostgreSQL · MongoDB · SQL · Data modeling · Docker · Git / GitHub · AWS S3 · PHPUnit

CERTIFICATIONS

IBM · Generative AI & RAG 2026
6 courses: RAG applications, vector databases, generative AI apps, Python for AI

University of Colorado 2026
Requirements engineering for secure software (2 courses)

Google 2026
Foundations of Project Management

Google · Web Development
Udemy · React, PHP, Laravel

LANGUAGES

Spanish — Native
English — Advanced

PROFILE

Full-Stack Developer with **more than 3 years of experience** and **Startup Perú 2025** winner, **owning end to end** the design, development and deployment of Maia Consultores' systems: food traceability, route optimization, a Google-integrated CRM and field operations. I build **robust, auditable software** with Laravel, React/Next.js and SQL, and develop **LLM-powered applications** backed by IBM certifications in Generative AI and RAG.

KEY ACHIEVEMENTS

Startup Perú 2025 Winner
Won the national program with Maia Plagas, a pest-control operations platform I built.

Meta Tech Provider
Led Maia Consultores to become an official Meta Tech Provider.

EXPERIENCE

Full-Stack Software Developer — *Maia Consultores* 2024 – Present

Food Traceability System — *Centro Carnes · Food industry*

- Facing **11 isolated official forms** with no lot traceability, I architected a document model with a **normalized projection** and **lot propagation** in **atomic transactions** with a before/after audit trail, delivering **lot-traceable, audit-ready records**.
- Multi-signer approvals with **re-authentication and row-level locks**; evidence validated by **real MIME type and SHA-256**, XLSX-to-PDF via **isolated LibreOffice**.

Laravel 13 · PHP 8.3 · Livewire 4 · MySQL · Spatie Permission · PhpSpreadsheet · LibreOffice

CRM Maia Consultores — *Commercial operations*

- With emails and calendars scattered and at risk of duplicates, I integrated **Gmail API with per-user OAuth 2.0**, **stateful queued sends** and **idempotency keys**, delivering **one auditable commercial record**.
- One-way **Google Calendar sync via webhooks/watch channels** with linked-event reconciliation; **event-driven automation engine** with job dispatch and cycle guards.

Laravel · Livewire · MySQL · Google APIs · Queues · Spatie Permission/Activitylog

Huracorp — *Waste management*

- For routes bound by time windows, drivers and vehicles, I implemented **k-means with Haversine distance** and a **nearest-neighbor VRP heuristic**, producing **scheduled routes with automatic limit warnings**.

Laravel 12 · MySQL · PHPUnit · AdminLTE

Maia Plagas — *Pest control · Startup Perú 2025*

- To stop hand-assembled reports, I built a relational platform for **cost-engineered quotes** (supplies, labor, vehicles, margin), multi-date services and **lot/expiry inventory**, with GPS + photo evidence on **AWS S3**: **PDF certificates generated from real field data**.
- Built the **PHP backend: offline-first REST API** with sync for the field mobile app.

Laravel 12 · MySQL · AWS S3 · Dompdf · Laravel Excel · Chart.js

AI Chatbot for Hortifruit — *Prototype · commercial proposal*

- For one of the world's largest berry producers, built a **generative-AI chatbot** tailored to their agro-export operations.

Freelance Developer — *Independent* 2022 – 2023

Esaalud Neuro (PHP, MySQL, RENIEC API) · **Bodega Don Pedro** (Next.js, MongoDB) · **Pizzería Elena** (React, MongoDB)

PERSONAL AI PROJECTS

- **Portfolio AI assistant — live, try it at onecodesite.vercel.app:** a bilingual chatbot that answers recruiters about my work, **grounded on a curated knowledge base** to prevent hallucinations. Built for **high availability**: automatic failover across 3 LLMs on Groq, per-model cooldowns, rate limiting and local fallback. Astro · TypeScript · Groq API · Vercel
- **AI Learning — in development:** AI-powered learning platform with **clean architecture** (11 domain modules, 4 layers), Google sign-in and a **Gemini adapter** unit-tested offline. Next.js · TypeScript · PostgreSQL · Drizzle · Auth.js · Docker
- **Course Notes Generator:** Python CLI that replaces manual note-taking by generating editable notes through an **LLM pipeline** (MiniMax). Python 3.12 · odfpy
